Russia Set To Scrap Over U.N. Budgeting

UNITED NATIONS, N. Y. (AP) — Russia publicly charged the United States and other U. N. members Monday that the great issue on U. N. financing at the opening general Assembly session Tuesday.

SOVIET FOREIGN MINISTER Andrei A. Gromyko gave the challenge to Secretary of State Dean Rusk at a meeting, their first since the new regime took over

control.

Shortly before their meeting, the Soviet delegation issued this statement:

"IN CONNECTION with reports published in the American press to the effect that the opening of the General Assembly should be postponed for a long period or indefinitely, the Soviet delegation deems it necessary to state that it categorically opposes such views."

"The Soviet delegation believes that the General Assembly should start and continue its work in accordance with normal procedure and that all important matters on its agenda should be deliberated in the usual manner."

U. S. DELEGATION was surprised and disconcerted by the tough Soviet talk. They had expected Gromyko to go along with mounting pressure at the United Nations to put off a showdown.

Will the Russians stick to their hard line right to the point where they will not vote in the General Assembly, or are they bargaining for a last-minute compromise?

Wednesday evening lecture, "Image of Man," will be at 8 p.m. in the multi-purpose room of the Smith Family Living

THURSDAY presentation, "How to Videotape for TV," will be at 8 p.m. at KBYU-TV, starts at 8 p.m. at the Recital Hall, Harris Center.

will be reserved for question the audience.

ata to Visit Y Center Cafeteria

by Elaine Goodman

University Feature Writer

Santa Claus is coming to the Y Center; not in the form of a little fat man with whiskers; not even in the form of a really big fat man with whiskers, but in the form of a really big fat man with whiskers.

On HARRIS, and Louise Green who head the crew of decorating the Y Center cafeteria, report that the hole Y Center is eventually to be decorated for Christmas. The cafeteria and snack bar are the first to be decked with holly.

Most of the kids who are helping are part-time employees of the Food Services. They work for three hours a day at the cafeteria or snack bar. I suppose you could call us above the call of duty," added Louise.

HE EMPLOYEES turned Santa's helpers for the evening to look strangely like pixies as they strung popcorn into the night. One snack bar employee turned popper, Glade Stewart, said between nibbles, "This is my job, but I just can't string all this popcorn and eat any of it."

However popped the popcorn must have been psychic, as were the majority of the white stuff on the tables. A few, under the tables, and in everybody's mouth. A few did manage to survive, only to be strung for the Christmas tree that stands in the cafeteria. AFTER IN THE MONTH all the employees in the area will be wearing Santa Claus hats, we hope," added Louise. "The hats aren't here yet. We want to create an atmosphere so that students will be able to come and enjoy the holiday fun here," said A cute girl pixie in a green sweater, Carol Bradshaw, who agreed more as she placed a white Christmas top the silverware holder in the cafeteria, and sighed like Christmas already."

Getting to know their competition before time are Lawrence Flake (left), Roderick Cameron and Ken Higbee. They will compete for honors in the Grant Oratorical Contest.

Three Oratory Finalists Will Present Devotional

Tuesday's 10 a.m. Devotional Assembly will commemorate the late President Heber J. Grant's 100th birthday by featuring the finalists of the annual Grant Oratorical Contest.

Insurance Issue To Be Discussed

The Senate passed last night a resolution recommending to the school administration to install hearing equipment in the Smith Fine Arts Center concert hall for the students who have hearing difficulties.

Students are invited to attend Monday's ASBYU Senate meeting to hear the debate on whether automobile liability insurance should be made mandatory.

A proposal to recommend to the school administration to make the insurance mandatory was introduced by Senator Jim Morten at last night's Senate meeting. The Senate will debate on the issue next week.

Senate member Vince Breig urged the Senators to collect opinions from the classes they represent, and bring them to the next meeting.

A Senate committee found out last week that more than 1,000 cars on campus are without liability insurance.

Extra Lines To Be Eliminated In 1964 600-Pint Blood Drive

This year students will be able to sign up for specific times to give blood so that the extra waiting will be eliminated, announced Dan Clegg of the Angel Flight, co-sponsor of the drive.

BOOTHES WILL be in the Knight Bldg., Y Center, Smith Family Living Center, and Mc Kay Bldg., on Tuesday and Wednesday, for students convenience. The booths will be open from 8 a.m. to 4 p.m. and will be given this year along with the traveling trophy. These plaques will be given to the organization, ward and residence hall with the

ACCORDING TO J. LaVar Bateman, coordinator of the contest, three students were selected from preliminaries during November.

They are Lawrence Flake, a junior speech major, speaking on "Spiritual Mediocrity"; Rod Cameron, sophomore from John Day, Ore., discussing "Tenebity"; and Ken Higbee, senior psychology major from Spokane, Wash., talking on "Curiosity or Creator?"

SOME OF PRESIDENT Grant's descendants who will attend the assembly will be Frances G. Bennett, Dessa G. Boyle, Anna G. Midgley, Lucy G. Cannon, Rachel G. Taylor and Florence G. Smith.

Winner of the contest will receive an autographed copy of a triple combination of the Book of Mormon, Doctrine and Covenants and Pearl of Great Price from Heber Grant Taylor, oldest grandson of the late president.

THE CONTEST IS one of the oldest at the university, started in 1921 by President Grant and T. Earl Pardoe, professor emeritus of speech, to promote public speaking among the youth of the Church. After President Grant's death, his daughter continued to sponsor the annual event.

Music will be provided by the Mormon Kammerchor, one of the groups which will travel to Salzburg, Austria, next semester. They will sing "Wir schen Euch Schwaben doch Euer Schenken" and "We haben mit Eager Yet Falterling Footsteps."

Activities of Y Center Week continue Tuesday with eliminations in the games area contests, demonstrations in the hobby shop, art sale registrations and the distribution of free movie passes.

THE DEADLINE for registration in the table tennis and chess contests is 4 p.m. Tuesday. Competitive eliminations will be held Saturday and Wednesday in preparation for the finale Thursday at 7 p.m.

All interested students are invited to participate in the bowling contest at 8 p.m. Thursday.

Deadline for entries in the "Moonlight and Magnolia" competition will be Thursday at 7 p.m. The registration fee of \$1 per couple will include all costs of bowling, shoes, and trophies.

At 1 p.m. Tuesday Bob Macrae will demonstrate a variety of leather tooling in the hobby shop on the first floor of the Y Center. Further hobby shop activities will include ceramic demonstrations, Wednesday at 7:30 p.m. by Lucile Bradford, and the "Chemicals Shop 744 E. 830 N. Provo." Tuesday, Dec. 9, Max D. Weaver, a faculty member of the BYU Art Dept., will hold a demonstration.

Woodwinds Concertize With Band

The College of Fine Arts and the BYU Music Dept. will present the Woodwind Quintet and the Concert Band Wednesday at 8:15 p.m. in the Concert Hall of the College of Fine Arts Center.

ADMISSION to the concert is by reserved seat and activity cards are required. Ticket distribution is taking place in F-303, HFAC and at Ext. 3001.

The Concert Band, conducted by Prof. Ray G. Saycock and the Woodwind Quintet, directed by Prof. Darrey Stubb, will present several numbers by various composers.

ONE OF THE featured works will be "Divertimento for Band" composed by Dr. Merrill Bradshaw of the BYU Music Department. Composed in 1957 by Dr. Bradshaw, it is a single-movement work of rather difficult proportions.

The title "divertimento" was chosen not so much from formal considerations as from the grounds that it started from a theme which had a "diverting" character said Dr. Bradshaw.

DR. BRADSHAW is in charge of the composition program and is co-ordinator of applied music at BYU.

Several of the numbers will be performed by the BYU Concert Band at the national convention of the College Band Directors' National Association, Dec. 18 in Tempe, Ariz.

Y Center Week . . .

Tuesday Big Day

Activities of Y Center Week continue Tuesday with eliminations in the games area contests, demonstrations in the hobby shop, art sale registrations and the distribution of free movie passes.

THE DEADLINE for registration in the table tennis and chess contests is 4 p.m. Tuesday. Competitive eliminations will be held Saturday and Wednesday in preparation for the finale Thursday at 7 p.m.

All interested students are invited to participate in the bowling contest at 8 p.m. Thursday. Deadline for entries in the "Moonlight and Magnolia" competition will be Thursday at 7 p.m. The registration fee of \$1 per couple will include all costs of bowling, shoes, and trophies.

At 1 p.m. Tuesday Bob Macrae will demonstrate a variety of leather tooling in the hobby shop on the first floor of the Y Center. Further hobby shop activities will include ceramic demonstrations, Wednesday at 7:30 p.m. by Lucile Bradford, and the "Chemicals Shop 744 E. 830 N. Provo." Tuesday, Dec. 9, Max D. Weaver, a faculty member of the BYU Art Dept., will hold a demonstration.

Students are reminded that from 3 to 6 p.m. Tuesday will be the deadline for entries in the art sales. Registrations will be accepted at the Service and Storage Room at the south-west end of the Y Center Ballroom.

"Education and Human Relations" . . .

Public Relations, Theme Of Montagu Publication

Editor's Note: The following is a review of last week's "Education and Human Relations" . . .

Montagu will visit the BYU campus Wednesday and Thursday as part of the educational affairs program.

by Donald K. Jarvis

"Education and Human Relations" by Arnold Montagu (Crown, \$3.95) is a book that any teacher's section of some of his previous publications. Montagu is one of the most prolific and interesting writers in the fields of anthropology and social biology.

"An intelligence that is not humane is the most dangerous thing in the world."

"In our school's we teach the three R's; the fourth R, relations, human relations, . . . we do not teach."

The above quotes indicate the theme of Dr. Montagu's collection. He doesn't claim that to be new; it was taught by Christ and many other educators. Peculiarly, though, Montagu claims that the source of pedagogy is "not only the searching out of the laws of influence of one people on another." (Tolstoy, L. N. Pedagogicheskaya Soschineniya, Ministry of Education of R. S. F. S. R., Moscow, 1953.)

WHAT IS NEW is that scientists should have made it the discovery of the importance of love by scientific means."

The author asserts that human relations can be learned in the schools other than in the home and should be the primary concern of educators.

Perhaps the average reader will be a little disappointed to find so few specific suggestions for teaching human relations in the public schools. He does suggest that "the principal task of our educational institutions in education is to prepare them (girls) in the theory and practice of being mothers."

ON THE OTHER HAND, he also suggests a four hour work

day for all fathers so that mothers can engage more actively in affairs outside the home.

Dr. Montagu also cites many interesting references indicating that cooperation and love are natural, innate tendencies, while hostility is acquired through frustration due to unsuccessful experience. The author makes a good argument for examples of universe discipline or withholding of love but in vain. Undoubtedly they are in the references cited, but a few in the text itself would have been most welcome.

Nevertheless, the author offers many thought-provoking comments on the following subjects:

ECONOMICS: "Those that would have us believe that almost everything in the world is determined by economics are wrong." (Compare with Karl Marx.)

DARWINISM: " . . . contrary to the popular Darwinian view, the main drives to co-operation . . .

are present in all forms of life and are much stronger than what are generally considered to be competitive drives."

FREE ENTERPRISE COMPETITION: "The fact is that men cannot live in competition with one another without breaking down under the strain."

RACISM: " . . . the truly humane right not only insists upon the right of everyone to be different but rejoices in most of those differences and is not indifferent to those which it may dislike."

MOTHERHOOD: The sense of motherhood must be raised if it is to be esteemed for what it is the most important of all professions.

The reader should not expect to find many specifics to chew on in **Education and Human Relations**, but will find broad challenges to many of his basic premises.

BYU Student Engineers To Visit Missile Range

Twenty-eight BYU electrical engineering students will visit the headquarters of the other telemetry and computer site on the Pacific Missile Range. The site editor is also planned for the visit of the U. S. Naval Missile Center BYU entourage. Thursday for a tour of laboratory and missile facilities.

The students, headed by Dr. Jens J. Johnson, professor of electrical engineering are scheduled to arrive in Point Mugu, Calif., Wednesday evening by bus, and return Saturday.

Thursday morning the group will be escorted on a tour of the recently opened systems integration laboratory. There the students will be shown aircraft mockups, missile system evaluations, laboratory and electronic analog computers for directing missile-armed aircraft into position for launching missiles against airborne targets.

The group will then visit the Pacific Missile Range's Weather Center to witness the launch of an ARCSAT meteorological rocket.

The ARCSAT is launched regularly from Point Mugu to probe the atmosphere to obtain weather data.

Before leaving the weather center, the students will be conducted on a tour of the building and hear a briefing on the Range's geophysics capabilities and programs.

A behind-the-scenes look at mod-

ern Navy aircraft and missiles, a tour of the Naval Missile Center's

and the site editor is also planned for the visit of the U. S. Naval Missile Center BYU entourage.

The deadline for receipt of applications is February 1, 1965. Awards will be announced by the participating agencies about April 1, 1965.

Further information may be obtained by contacting the Graduate Dean's Office, L-208 Smoot Administration Bldg.

Utah To Get Fund For Education

WASHINGTON—Utah has been allotted \$657,139 for the improvement and extension of vocational and technical education, according to the office of Senator Wallace F. Evans (D-Utah).

The funds were allotted to the state by the Office of Education in the Department of Health, Education and Welfare and made available under the Vocational Education Act of 1963.

The grants are made to colleges and universities and other public and non-profit private agencies and institutions to state boards of vocational education and to local educational agencies with the approval of appropriate state boards.

Applications for them are being received by the Office of Education.

The national total was listed at

\$165,697,278.

Research Available To Students

The National Academy of Sciences-National Research Council announces its programs of Postdoctoral Resident Research Associateships supported by several agencies of the Federal Government.

Through these associateships, tenured at certain government agencies and research centers, young investigators of promise are offered an exceptional opportunity to receive advanced training in well-equipped laboratories among highly qualified scientists dealing with various fields of fundamental and applied research.

PARTICIPATING laboratories are at the National Bureau of Standards, the National Bureau of Standards, the National Research Council, the Naval Research Laboratory (Washington, D. C.), Naval Ordnance Laboratory (White Oak, Silver Spring, Md.); Naval Weapons Laboratory (Dahlgren, Va.); Navy Electronics Laboratories (San Diego, Calif.); Naval Medical Research Institute (Bethesda, Md.); Army Ballistic Laboratories (Fort Detrick, Frederick, Md.); 9 pioneering or basic research laboratories of the Agricultural Research Service; 5 technical centers of the Air Force Systems Command and Office of Aerospace Research; and 8 research centers of the Weather Bureau.

APPLICANTS will be required to present evidence of training equivalent to that represented by the Ph.D. or Sc.D. degree and to demonstrate superior ability for creative research.

The stipend for these programs will be \$10,250, subject to Federal income tax.

Brochures describing these separate associateships in detail may be obtained by writing to the Fellowship Office, National Academy of Sciences, 2101 Constitution Ave., N. W., Washington, D. C. 20418.

The deadline for receipt of applications is February 1, 1965. Awards will be announced by the participating agencies about April 1, 1965.

Further information may be obtained by contacting the Graduate Dean's Office, L-208 Smoot Administration Bldg.

Graduate School Advisors To Visit

Two of America's leading graduate schools of business and administration will have representatives visiting the BYU campus on a week-long tour to be led by R. Wayne Hansen, Supervisor of Technical Placement Section.

Mr. James O. Massey, from the University of Southern California, will be on campus on Wednesday. He is interested in talking with students from any undergraduate academic area regarding the graduate program at USC.

On Tuesday, Dec. 8, Mr. William C. Hannemann will be on campus representing Stanford University Graduate School of Business. He will be available to explain the requirements of the MBA and Ph.D. programs available at Stanford.

Any student desiring to see these representatives may make arrangements for interviews by contacting the Placement Center, L-200 Smoot Administration Bldg.

Campus and Comment Controversy

Letters To Editor

Letters to the Editor are encouraged by the Daily Universe and will be printed in the opinion column, signed or anonymous.

Letters must be submitted, signed with name, address and telephone number, and the editor reserves the right to edit any letter because of content or character.

Letters will be shown in the printing, and the editor reserves the right to reject any letter because of content or character.

The Animal School

Once upon a time, the animals decided they must do something to meet the problems of a new world. So they organized a school.

They adopted an activity curriculum consisting of running, climbing, swimming and flying. It made a start to administer the curriculum, all the animals took the courses.

The duck was excellent in swimming, in fact, better than the instructor; but he made only passing grades in flying and was very poor in running, he had to stay after school and also drop swimming in order to practice running. This was kept up until his web feet were badly worn out but he was only a swimmer. His average was abysmal in school, so nobody worried about that except the duck.

The rabbit started at the top of the class in running, but had a nervous breakdown because of so much make-up work in swimming. The squirrel was excellent in climbing until he developed frustration in the flying class where his teacher made him start from the ground up instead of from the squirrel's own nest. He never learned to fly, but he was a good climber and then got a C in climbing and a D in running.

The eagle was a problem child and disciplined severely. In the climbing class he beat all the others to the top of the tree but never did use his own way to get there.

At the end of the year, an abnormal eel that could swim exceedingly well, also run, climb and fly a little had the highest average and was valedictorian.

The prairie dogs stayed out of school and fought the tax law because the administration would

not add digging and burrowing to their curriculum. They caused their child to a badger later joined the groundhogs the gophers to start a successful school.

Assistant Superintendent
Cincinnati Public Schools

What Is A Cheerleader

Last week, during the man-Varsity Game, some college mates of the editor put on a beautiful display broadway on the score. The game was missing, as an empty, like what was missing, in the seating. Then, doing something different for a college game (thinking), it dawned on me it was. Evolution had come to us.

The word cheerleader keeps in mind through my mind. Who is a cheerleader? One who I cheer, of course. I'm sure that was the original idea. Please, let's get back to have man. It's a good game. The editor (Zeb) and I were great lifters of the spirit. Bring 'em back.

Why not put the can-caners back in the theater like they belong?

Speeds To Rendezvous

flight, scientists at jet propulsion laboratory began pondering the best time to order a change in the way they hope will curve Mariner 4 into 8,600 miles of Mars next July.

When launched Saturday at Cape Kennedy, Fla., the camera-toting spacecraft went into a trajectory that would miss Mars by 200,000 miles. Jet lab scientists, who built Mariner 4 and are controlling its flight by radio, say they can correct any error up to one million miles.

THEY HOPE TO make the mid-course correction sometime this week by triggering a small craft on board the 375-pound Mariner 4 that will drive it closer to Mars. Still to be determined are the precise time and duration of the direction-changing rocket's burn.

At noon Monday Mariner 4 was

425,885 miles from Earth, travel-

ing at 7,800 miles an hour, a speed

that will allow it to coast

coasts through space toward a

rendezvous that could help ex-

plain such ancient mysteries as

Mars' "Canals" and solve the

question of whether life can exist

on the desert-like planet.

As Mariner 4's cameras have

used the North Star as a guide-

post, Mariner 4 is using the giant

star Canopus (Can-o-pus), sec-

ond brightest star in the heavens

and brightest in the Southern sky.

ANCIENT PEOPLES of Asia and Africa worshipped Canopus

for its blue-diamond brilliance.

Egyptian priests 8,000 years ago

thought it was the herald of the

Sun and built their temples so

they could watch its blazing path

across the Southern sky.

One of the biggest single stars

Don't Beat Up On 'Em Patience With Vendors

The vending machines on BYU campus are a handy way to grab quick lunches or fast snacks.

AT THE SAME time they have caused irritation and frustration by failing to function properly. But in most instances this is due to students not following instructions correctly, according to Eugene Swan of vending services.

The machines will only take American coins and will not accept foreign coins. As students drop the money in the machine it falls on to a scale which balances the coin. It then passes an electromagnet which determines the amount of alloy.

THE COIN then drops to an armful, and if it has the right balance, it goes through another scaling apparatus which measures the diameter of the coin and

distributes the coins to the proper value slots.

Swan said that if students would wait a couple of seconds to allow the coin to go through this complete process before pulling the lever, they would have much better results.

CANADIAN MONEY will not operate the machine, nor will paper or nickels. Some students with imagination have even tried wrapping tin foil over a penny.

One student even folded 25 cents worth of soap bubbles and expected to receive change, Swan said.

Pounding, kicking, or banging the machines if they fail to operate correctly just causes more damage to the machine and delays repairs, said Swan.

Students may get refunds on coins through machine failure at five different locations on campus: Cannon Center recreation desk, Desert Hall recreation desk, Food Service Office - C-184 in the Smoot Administration Building, 329 the Y Center and the Wyndham Terrace Housing Office.

These machines were put on the campus for student's convenience. Profits are returned to the school for studentbody activities, concluded Swan.

Educational TV System Discussed

A panel discussion concerning the various departments within the educational television system in public schools was discussed at the Communications Symposium held Monday in F-201, HFAC.

THE PANEL composed of Bart Bell, program manager of KUED-TV; Jim Utley, director of Utah; Milton Sharpe, production manager of KWCS-TV in Ogden; Harold Hickman, manager of KOET-TV, Ogden, and David Graham, studio operations supervisor of KBYU-TV, Provo, was lead by Jim Owen of Rich of the BYU communications dept. The group represents the board of the Utah Association of Educational Broadcasters.

They explained that the most important department in broadcasting was the production dept. supported closely by the engineering dept. Both departments work together to produce the end product which either makes or breaks the particular news or program.

The management must decide between quality or quantity in the programs they broadcast plus deciding the policies, budget and staffing of the stations, the panel concluded.

B. Christiansen Among Chosen

AWS Preference Bell Committee announced that Bob Christiansen is among the 12 Preferred Men elected last week by code vote.

He is from Ely, Nev., a sociology major, and was sponsored by Deseret R and Broadcast Halls.

THE "MOST Preferred" man will be announced Friday.

Last preference week all code will be Tuesday, Wednesday and Thursday from 9 a.m. until 4 p.m. in 113 Y Center.

Special invitations for missionaries, etc. will be sold beginning Friday in 113 Y Center from 9 a.m. to 4 p.m., for 10 cents each.

Continuing Education Division Names Two Department Tops

Appointment of two department chairmen in the Division of Continuing Education at BYU was announced Monday by Dean Glen C. Jones.

D. Chris Poulos was named chairman of the Department of Education Weeks. He will set up and supervise the weeks in about 45 cities throughout West-United States and Canada each summer.

W. GRANT LEE was appointed chairman of a new area, Off-Campus Lectures and Courses Division.

The new department will handle all programs not scheduled on campus or at education centers.

These programs include lecture tours, seminars, workshops, education days, educational television and programs for the underprivileged.

POULOS RECEIVED the BS degree in psychology in 1957 and an MS degree in 1962 from BYU. He served as an administrator

interviewer with the Utah State Employment Service before joining the BYU faculty in 1966.

Lee received a BS degree in psychology in 1957 and the MS degree in sociology in 1961 at BYU. For four years he has served as supervisor of special credit and non-credit programs in the Division of Continuing Education.

Focus on Sports

All Teed Up

by Stan Hodge, Sports Editor

There's snow covering the Tim Golf Course right now. Big drifts of it.

Back in Wisconsin in weather like this they paint the balls red and let the duffers play between the drifts. Guess that's where winter rules got their start!

I never knew too much about golf until last spring when I took the class offered by the physical education department. I learned quickly though that nothing counts in golf like your opponent. Golf, it seems, is a sport where the ball lies poorly and the players well.

Top Performance Scheduled by Cat Golfers

But there's one group of linksters on campus who need no lying to establish themselves on the greens and fairways. (In our final in that class one of our duffers told the instructor that the fairway was that part of the course which he walked back and forth across when he played.)

That group, of course, even in dead of winter needs no introduction. Karl Tucker's Varsity golfers have always been a top-notch crew, but this year he says they'll top all performances.

"BYU golf has probably never looked brighter," Tucker commented recently.

He wasn't just blowing wind either—he had facts to back him up. The squad has already participated in two tournaments this fall. The Cats won the Beehive State Invitational held in Logan. A new record was set in the six-team tournament—550 strokes for 54 holes. Two of the BYU golfers, Kean Ridd and Mike Taylor, tied for second, one stroke behind.

Statistics Back Up High Hopes

The team also competed in the William H. Tucker Intercollegiate Tournament held in Albuquerque, N. M. Sixteen of the nation's top college teams, including all the Western Athletic Conference teams and NCAA champion Houston University fought for the hardware. BYU finished a strong fourth—five places higher than they have ever finished before.

Taylor, a freshman from Meridian, Miss., set a new record, having an 18-hole score of 64. The old record of 67 had stood for the past 15 years. Kean Ridd won the long drive contest at the Albuquerque tournament with a poke of 368 yards.

Other outstanding prospects on the squad are: Kent Vernon (three-year letterman), a senior from Pocatello, Idaho, who won the Idaho State Amateur 1964 meet; Mike Smith (two-year letterman), a junior from Granger; Mike Reason, a junior transfer student from Seattle, Wash.; Bruce Difloure (a two-year letterman), a junior from Las Vegas, Nev.; Pete Stepp, a junior transfer from Phoenix College, Ariz.;—that team finished second in the 1964 National Junior College Tournament; Craig Ridd, sophomore from Sandy; and Gerald Elwell, a sophomore who placed first in the All-Climate Junior Championship.

Also, coming back for play in the spring will be Bud Allin, the outstanding prospect last fall who was called home to Santa Barbara.

National Champ To Join Club

And that isn't all. The probably most sought-after junior player in the United States will be enrolling at BYU for the spring semester. Coach Tucker says John Miller, the 1964 National USA Junior Champion is unquestionably the finest golfer ever recruited by BYU. Sports Illustrated this fall (Sept. 16) said the San Francisco high school senior is one who tries to play "as boldly as Arnold Palmer."

And the USGA Golf Journal said the following: "... John Miller ... is the best golfer and the best competitor of this year's junior crop."

"Miller, current California Junior Champion and 1963 San Francisco City Champion, won medalist honors by two shots with 71-68-139, three under par."

"The 139 he shot in qualifying was an exceptional score. The Eugene course played at 6,627 yards and almost all fairways were lined with giant Douglas fir trees up to 250 feet high with trunks of six feet or more in diameter. A wild driver was in trouble; you can't play over a Douglas fir!"

The Cougars' schedule this year will take the team from California to Colorado and, of course, includes the hope that the Cat Golfers can improve their position in the WAC Championship this spring. Last year they finished third after leading for two days and couldn't hold on to the last 18 holes.

All in all it looks like a good year for the BYU golf team.

A Side Thought—Where'd It Go?

I was just wondering—side track though it is—Dean Herald R. Clark asked me where the Old Wag-on-Wheel was. I hunted through the Y Center but couldn't find him nor spoke of it. Where did it go? Sure would look nice in the Y Center.

Redskins Fear Loss of Scalps In Cage Debut

by Bruce Van Orden
University Sportswriter

The University of Utah opens its 1965-66 hoop campaign Tuesday against New Mexico State at Elmer Nielsen Fieldhouse in Salt Lake City.

COACH JACK GARDNER of Utah has more fears than excitement this opening, and they are either since his team, coaching at Utah in 1953, New Mexico State has been playing some early games in Mexico City and will come into the Ute game with considerable game experience.

Coach Fredery Askew of the Aggies is counting on 70', 24-point Mike Dabich from Sheridan, Wyoming to lead his young team to victory. A stingy defense and excellent rebounding are expected to be New Mexico State's best assets.

COACH GARDNER of the Redskins was quite disappointed with his team's showing last Tuesday night against the fresh and fast team was fortunate to squeak out a narrow victory. Gardner says, "The trial ball game substantiated what I have said all along. We are weak on the boards and lack a good defense. In fact, after the ball game it became apparent that I had to make some changes to compensate for these glaring weaknesses."

GARDNER PLANS to start George Fisher and Jerry Chambers at forwards, sophomore Bill Ivie at center and Skip Kroeger and George Rawlins at guards. This arrangement is expected to give the Utes a bigger front line.

Ivie is 6-5, Fisher, 6-6, and Chambers 6-4. Ivie as a sophomore and Chambers as a junior will be joined in the front line in the first collegiate contest. Of the starting five, only Fisher and Kroeger have ever felt the heat of college competition.

Coach Gardner points out that a definite starting five will only be found after more game experience and that Tuesday's starting five could be jiggled.

Michigan Edges UCI Brigs 19th In First Rating

NEW YORK (AP)—Michigan, with stars Cazzie Russell and Bill Buntin back, was picked Sunday as the top college basketball team in the country in the pre-season poll by the Associated Press. The season opens Tuesday.

BRIGHAM YOUNG University placed 10th on the poll because the starting five returns and they are backed by a tremendous sophomore crew. John Falchild is back too and this adds to their imetus.

These three western powers received an honorable mention on the poll. They were Utah State, Wyoming, and Arizona State Universities.

UCLA, the NCAA champs of 1964 were edged by the Wolverines from Ann Arbor, Mich., by 10 points in the voting by a 33-man panel of sports writers and broadcasters.

UCLA went through the 64 season unscathed, topping off its 30-0 slate with a 98-83 victory over Duke in the NCAA title game. Michigan, beaten by Duke, 91-80 in the semifinals, finished third in the championship tournament, downing Kansas State, 100-90.

MICHIGAN GAINED 15 first-place votes and an overall total of 302 points on 10-8-8-7-6-5-3-2-2 basis. The Wolverines, which the experts feel will be hurt by the loss of All-American Walt Hazzard, polled 12 first-place votes and 292 points over-all.

THE WOLVERINES, and the Badgers, lost considerable the rest of the field. Wichita, with Dave Bialoski eligible until February, was third with 113 points.

Davidson, with big Fred Hetzel back, was fourth with 102 points. **ROCKY MOUNTAIN** THE top western Duke, Vanderbilt, Syracuse, Kansas State, San Francisco, and St. John's of New York in that order.

Duke is a familiar name from the pre-season poll for last season in which Chicago's Loyola, New York's Union, and Cincinnati were ranked 1-2-3.

FIRST PLACE VOTES in par-

thesis, last season record total points on a 10-8-8-7-6-5-3-2 basis:

1. Michigan (19) 23-5

2. UCLA (12) 30-0

3. Wichita (11) 22-4

4. Davidson (1) 22-4

5. Duke 26-3

6. Vanderbilt 19-6

7. Syracuse 17-8

8. Kansas State 22-7

9. San Francisco 23-5

10. St. John's N. Y. 14-1

Engineering Student Competes For Honors

Brent Paul, fifth year student in mechanical engineering at BYU, will present an award-winning paper at the national convention of the American Society of Mechanical Engineers in New York, Nov. 30 to Dec. 3.

New Program Seeks Tutors

With the newly initiated tutoring program in Cannon Center more tutors are needed in mathematics.

Tutors participating in this program will be paid \$3 per evening (from 7:30 p.m. to 9:30 p.m.) Monday, Wednesday, and Thursday.

ANYONE interested in working during these times is encouraged to contact the Tutoring Service in C-202, Smoot Administration Bldg., Ext. 2723 as soon as possible.

With the increase in demand for tutoring more tutors are also needed in economics, chemistry, and physics.

Tutors should have at least a 3.0 grade-point average and have completed at least some of the upper-division courses so that they will have a broad enough background to help those who request their services.

PAUL WILL competes with top engineering students from 13 other regions in the United States. He is the winner in the region represented by New Mexico, Colorado, Wyoming, Montana and Utah. The national winner will receive a cash prize and a gold medal.

The paper concerns "Heat Transfer due to Convection and Radiation in a Wall Section."

DR. JOHN M. SIMONSON, professor of mechanical engineering at BYU, will accompany Paul to the convention.

Paul, whose home is Short Hills, N.J., married Elizabeth Miller of that city and filled a mission to France for the Church of Jesus Christ of Latter-day Saints, 1959-1962. He is president of the BYU Chapter of the American Society of Mechanical Engineers.

Need Volunteers

Volunteers are needed for the AIMS-AWS project. All who wish to help save 80 Puerto Rican families with a memorable Christmas should drop by the AWS office.

There are many families left on the list for those individuals, words or organizations who want to help in the drive.

Student Recitals Will Resume Wednesday Noon

The "Music at Mid-Day" student recitals will be resumed in the Recital Hall in the Harris Fine Arts Center Wednesday at 12:15 p.m. conducted by Bob co-ordinator of the recitals.

THE PROGRAM will open with Pat Brewer, piano, playing "Toccata in G Major" by J. S. Bach followed by Arnie Workman, trumpet. Trombones, Debbie, Kathy Bird, oboe, and Mary Alice Collier, harpsichord playing "Trio Sonata in D" by Nicola Porpora.

Concluding the program will be a demonstration of composition and art department by Merrill Bradshaw, Reid Nibley, Ralph Woodward and Darrel Stubbs faculty members of the Music Dept., said Bos.

Law School Dean To Visit Campus

Dean John Bainbridge of the Columbia University Law School will visit BYU campus Dec. 2 to interview any students interested in the study of law at Columbia. Students who wish to have a private interview should make an appointment with Dr. Stewart L. Graw, 356 McKay Building.

Dr. Bainbridge will give a public lecture at 2 p.m. in room 310 McKay Building. All students interested in the study of law are invited to attend.
